

California Environmental Protection Agency
 **Air Resources Board**

Thanks again Russ for following up, and my apologies for not getting back to you back in March. I left a message asking our Legal staff if we can add to the list of air cleaners to avoid...we'll see what he says. In any case, Odorox is on a list we have of non-compliant companies, and, as I mentioned, we plan to take some action on those companies in the next few months, although I'm not sure what form it will take. Unfortunately there are a lot of them.

Thanks again,

Peggy
